27th July 1959.COCOM Document 3631 B.COORDINATING COMMITTEEMEMORANDUM BY THE ITALIAN DELEGATION

4238074

EXPORT OF BORAX TO POLAND

The Italian authorities have been asked to license the export to Poland of 120 tons of borax, value \$ 14,106, and 37 tons of boric acid, value \$ 7,625. These products, which are covered by Item 1715 on the International Lists, have been ordered by the Towarzystwo Dla Mandlu Zagaranicznego Ska z.c. of Cracow and their use will be exclusively civilian as they will be employed in the enamelling of kitchen utensils.

The firm interested in this transaction have previously requested and obtained authority for a similar import (COCOM 3392 of 10th February 1959).

The Polish authorities have given the required assurances as regards the end-use of these products and have undertaken that they will be neither diverted nor reexported to other countries.

The Italian authorities therefore request the Committee to be good enough to approve this export within the framework of the exceptions procedure established for Poland. They would request Participating Countries having objections to raise to be so good as to make them known before the 15th August 1959.
